State of Alaska Department of Fish and Game Nomination for Waters Important to Anadromous Fish Juneau B-5 **USGS Quad** Region SOUTHEAST Ŧ Anadromous Water Catalog Number of Waterway 114-23 - 10209 - 2015 ☐ USGS Name Name of Waterway Local Nam ☐ Correction **Backup Information** ☐ Deletion For Office Use Nomination # Regional Supervisor Date Revision Year: Revision to: Atlas Catalog Date Both 12/9/97 Revision Code: Drafted Date **OBSERVATION INFORMATION Species** Date(s) Observed Spawning Rearing Present Anadromous X Coho Salmon 8/3/96 16 IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc. Comments: On August 3, 1996 one baited minnow trap was set in a small tributary to Homestead Creek, immediately in front of a private residence currently owned by the Olney family. During 110 minute soak 16 coho salmon fry were captured. This appears to be the extent of anadromous fish habitat. Name of Observer (please print) Ben Kirkpatrick -- Habitat Biologist JAN 17 1997 Signature: Date: 1/13/97 Address: ADF&G Habitat and Restoration Division AND RESTORATION Box 240020 Douglas 99824 This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist:

Clayton R. Houlker 110

Revision 11/96
